Dedication

This startup is dedicated to my father, my stepmother, and my late mother —
whose guidance, strength, and blessings have shaped my journey.
Their combined love and belief in me are the foundation
upon which EnrollX stands today.

Abhishek Verma
Founder, EnrollX

"EnrollX is built to simplify access to libraries, coachings, and learning spaces — all with one smart card. Our mission is to boost student productivity with technology-driven solutions. We've already built a fully functional website and app, and many students are actively benefiting from it."

ABOUT OUR STARTUP

A Brief Story About The Startup

EnrollX was born from a simple idea — to make student life easier. While juggling between different libraries, coaching classes, and training institutes, we realized the need for one unified access system. That's when the EnrollX Card came into existence — a single smart card for attendance, access, and activity tracking.

Founded by Abhishek Verma, EnrollX has grown into a powerful platform that not only empowers students but also provides complete digital management for institutes and libraries. From automating attendance to sending fee reminders, managing memberships, and handling student complaints — everything is streamlined under one dashboard.

The journey has just started, and 2025 is the year we scale.

OUR PURPOSE TO BUILT IT

Revolutionizing Education Management for Local Institutes: Introducing Enrollx

In today's digital era, most leading organizations — from large corporations to reputed coaching institutes and well-established libraries — have already transitioned to fully automated systems to manage their data and operations. These systems not only save time and resources but also ensure accuracy, efficiency, and real-time access to information.

However, a significant gap still exists at the local level. Many small to mid-sized educational institutes in our city continue to rely on outdated manual methods — maintaining registers, handwritten logs, and scattered paper files to manage thousands of students. These institutions, despite having large student bases, often face chronic challenges such as:

- Difficulty in retrieving old student records
- Inability to track and manage pending fees
- Lack of visibility into complete student profiles
- Errors in attendance management and performance monitoring
- Delayed decision-making due to scattered or inaccessible data

These challenges not only slow down daily operations but can also result in financial losses, reputational damage, and overall mismanagement.

The Solution: Enrollx – Smart Data Management for Smart Education

To bridge this critical digital divide, we proudly introduce Enrollx — a powerful Automated Data Management Control Website tailor-made for local educational institutes.
Enrollx is more than just a software — it's a transformation tool designed to bring digital empowerment to institutions of every size. With its intuitive design and easy navigation, even non-technical users can quickly adapt to the platform.

With Enrollx, institutes can now:

- Digitize and centralize all student records
- Access real-time data anytime, from anywhere
- Manage admissions, fee payments, student profiles, performance reports, and attendance — all through one seamless dashboard
- Eliminate paperwork, reduce errors, and improve communication between staff, management, and students

Why Choose Enrollx?

- Easy to Use: No technical background required
- Cloud-Based: Access your institute's data 24/7
- Customizable: Tailored features for your specific needs
- Secure & Reliable: Data privacy and backup systems in place
- Scalable: Suitable for coaching centers, schools, libraries, and more

Experience the Change

Enrollx is here to empower local institutes with the tools they need to grow and thrive in the digital age. Say goodbye to register chaos and manual errors. Say hello to automation, clarity, and control.

Enrollx — Smart Management. Smarter Future.

VISION

To revolutionize the way students access and engage with educational spaces by creating a unified, smart, and seamless experience through the EnrollX Card.
We envision a future where every coaching institute, library, and training center operates efficiently with smart attendance, automation, and complete digital student management — all from one platform.

MISSION

01

To empower institutions by providing a complete management system that simplifies attendance tracking, fee reminders, student support And many more.

02

To enable students with a single EnrollX Card that grants access to multiple facilities — coachings, libraries, gyms, and training centers — boosting their productivity and convenience.

03

To bridge the gap between traditional educational infrastructure and modern-day student needs using scalable digital tools and automation.

04

To continue evolving with technology, feedback, and innovation to ensure EnrollX stays future-ready and impactful for both institutions and learners.

PROBLEM

💻 **A Brief Story About The Problem**

Most coaching centers, libraries, and training institutes still handle things manually. They take attendance on paper, send fee reminders through calls or messages, and manage complaints using notebooks or verbal feedback. This old system causes a lot of confusion and waste of time.

No tracking of student activity

Institutes don't know how often a student comes to class or library, and students also can't check their usage history.

No auto-reminder for fees

Students often forget to pay on time, and staff have to call or message every student again and again.

No proper attendance system

Institutes don't have any smart way to track who is present or absent. Many times, fake attendance is marked or data is lost.

No proper fee management

There is no smart system to track who paid, how much, or when the next payment is due. Staff maintain registers or Excel sheets, which can have errors.

No faculty and staff management

There is no system to track faculty attendance, performance, or work schedule. Managers also face issues in daily task tracking and staff coordination.

No test and report tracking

Many institutes conduct tests but don't have a system to record marks, generate progress reports, or share performance updates with students or parents.

No monthly report generation

nstitutes and libraries cannot easily generate monthly reports for Earnings, attendance, performance, or usage. This makes it hard to measure growth or take action.

No proper student database

nstitutes do not maintain a clean and complete database of all students. Many details are missing or scattered, which creates problems during exams, events, or communication.

No access to paper records anytime

Paper registers are not available everywhere or all the time. If staff or admin need old data, they must go and search manually.

SOLUTION

How EnrollX Solves These Problems

EnrollX is a smart digital solution designed to manage coaching institutes, libraries, and training centers with ease. It replaces all manual work with a simple, all-in-one system that saves time, reduces errors, and improves student and staff experience.

Total successful bookings for June 2025.

Attendance System

EnrollX Smart Card + App tracks student and faculty attendance in real-time. No need for paper registers or old machines. Every entry is auto-recorded and stored securely.

Automatic Fee Reminders

EnrollX sends auto-reminders to students and parents before due dates via SMS or email. Staff don't have to remind each person manually.

Smart Fee Management

All fee records are stored digitally. You can easily check who paid, how much is due, generate receipts, and download full fee reports.

Student Activity Tracking

Track how often a student visits class, library, or any facility. This helps improve discipline and gives students a clear record of their progress.
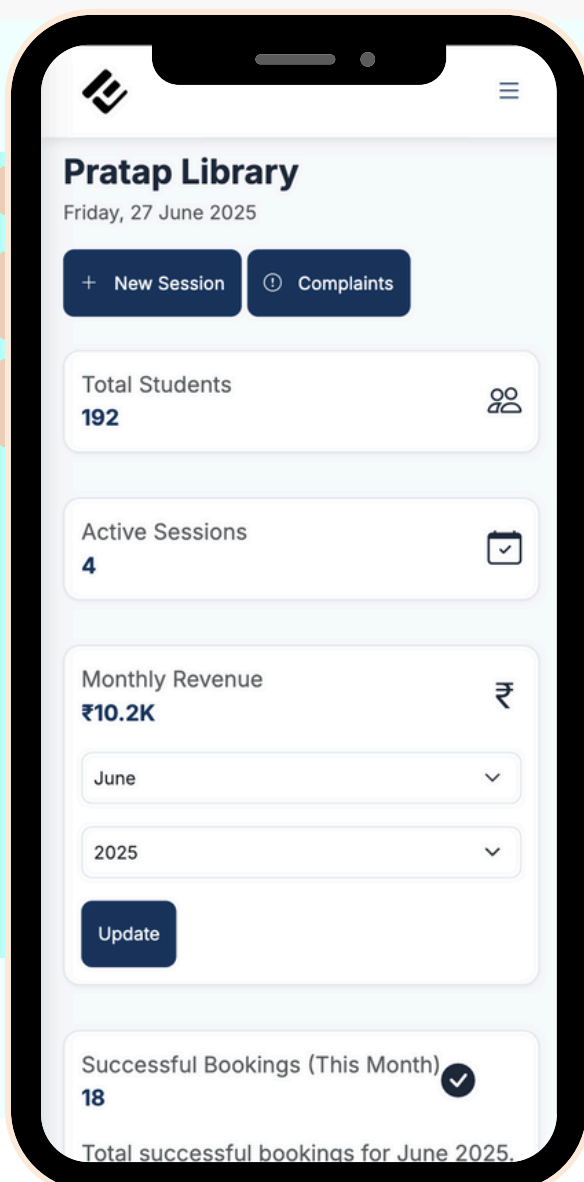

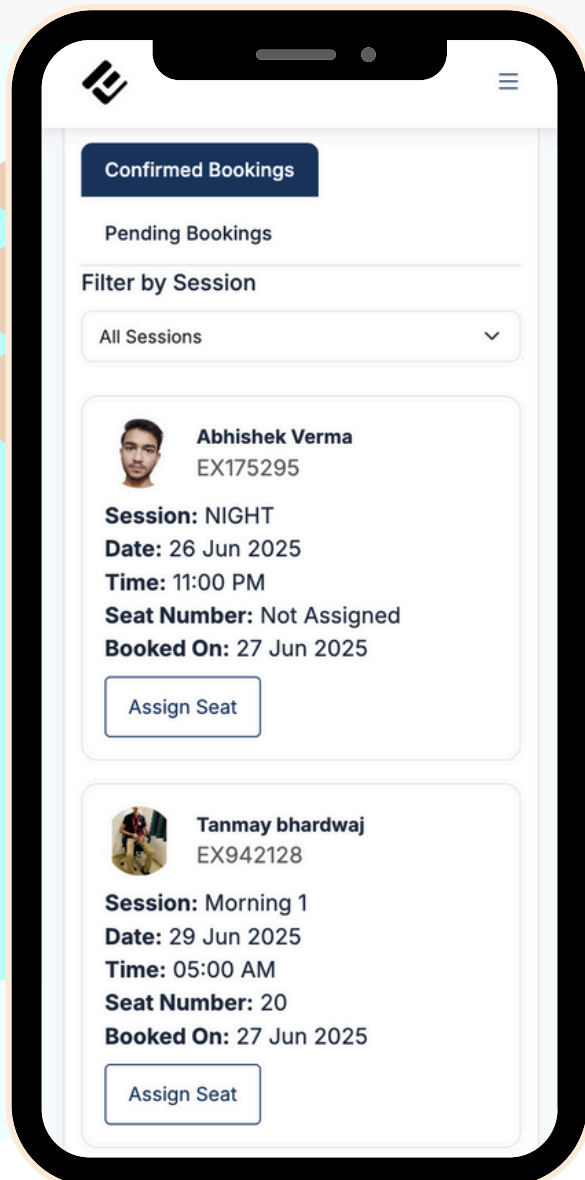

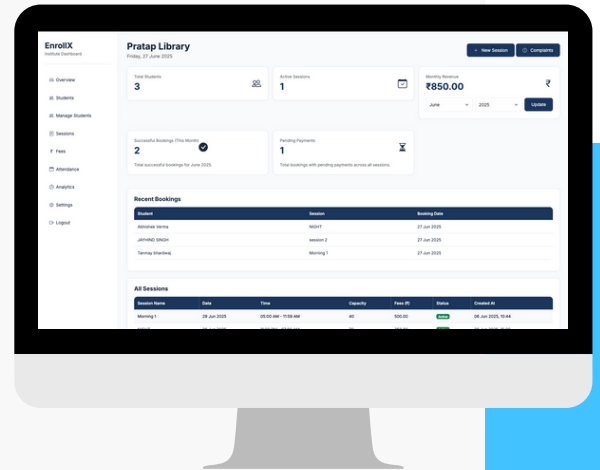

SOLUTION

How EnrollX Solves These Problems

EnrollX is a smart digital solution designed to manage coaching institutes, libraries, and training centers with ease. It replaces all manual work with a simple, all-in-one system that saves time, reduces errors, and improves student and staff experience.

✅ Test & Progress Reports

Create, conduct, and record test marks easily. Share detailed progress reports with students and parents instantly.

✅ Faculty & Staff Management

Track faculty attendance, manage their schedules, assign tasks, and monitor performance — all from one dashboard.

✅ Digital Record Access Anytime

All records are stored online. Whether you're in the office or working remotely, you can access any record instantly — no need to search paper files.
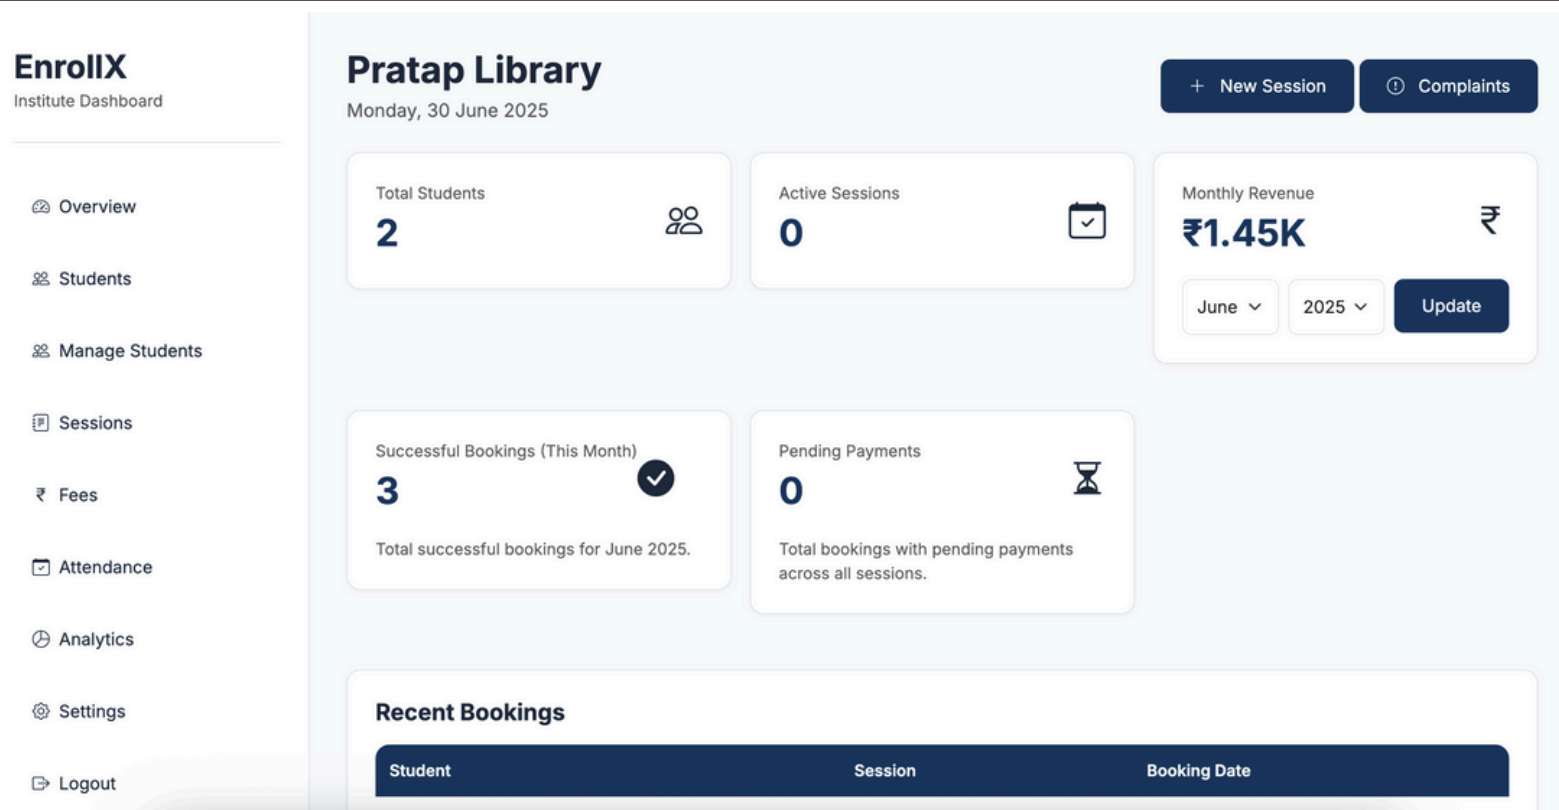

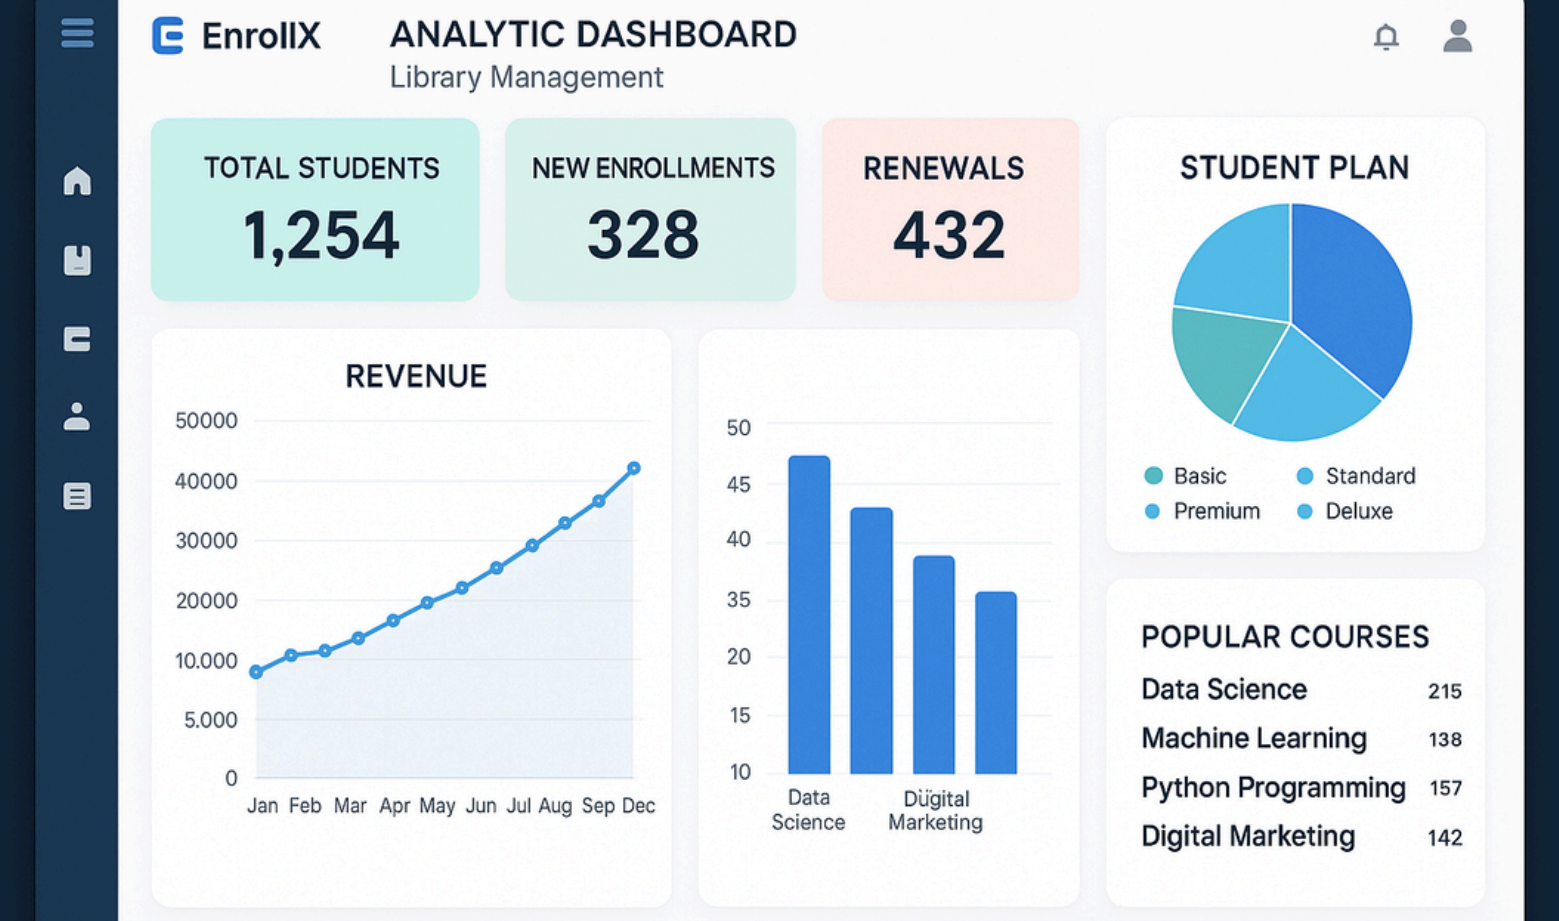

✅ One Integrated System

No need for 5 different tools. EnrollX handles everything — attendance, ID, fee, complaints, reports, and more — in one easy-to-use platform.

✅ Monthly Report Generation

With one click, generate monthly reports for attendance, fee status, test results, and student engagement. Great for management reviews and audits.

A Brief Story About The Product

EnrollX is a complete smart management system for coaching centers, libraries, and training institutes. It includes a digital dashboard, smart NFC attendance device, and a student app — all working together to make daily tasks easier, faster, and smarter. What makes EnrollX special is that we have custom-designed our own smart attendance machine, built specially for the needs of educational and learning centers. This machine uses NFC technology and works perfectly with the EnrollX system for accurate and contactless attendance.

And the best part? This smart machine is provided free of cost to every institute or library that joins the EnrollX platform — helping them go digital without any extra investment.
Our goal is to fully digitize student and institute operations with one powerful and affordable platform.

Internet of Things (IoT)

EnrollX uses NFC-based smart cards and IoT-enabled devices to track attendance in real-time. Each student gets a smart card which they can tap to mark attendance, access libraries, and more. All data is instantly synced with the cloud dashboard — no manual entry needed.

Artificial Intelligence

Our system auto-generates monthly reports, progress tracking, fee reminders, and even predicts student performance using AI logic. It helps institutions identify active/inactive students, manage faculty performance, and take data-driven decisions for growth.
